

## ABOUT APCER

In a competitive and challenging global market, APCER plays a vital role in the success of organizations. As a result of its reputation for thoroughness, its diverse portfolio and its ongoing investment in innovation and new product development, APCER adds value and contributes to improve the performance of its key partners: its clients.

**APCER positions itself as a global business partner, providing certification, audit and education & training services.**

APCER operates globally, directly or through partnerships. APCER's international presence is strengthened by its participation in IQNet – The International Certification Network, present in over 150 countries. This international network of certification bodies is a world leader in the certification of management systems and ensures APCER's clients an international recognition of their certification.

APCER has also established a partnership with ISACert which is based in the Netherlands and operates in many countries of Europe, Asia, Africa and America. This partnership allows APCER to operate as an exclusive ISACert representative in Portugal and other countries, with a wide range of products on the food sector.

## APCER'S TEAM SKILLS

APCER has a strong team, made up of highly qualified people in various activity sectors, with the clear objective of creating competitive advantage for clients by striving on a daily basis for quality and excellence in the services APCER provides.

## RECOGNITION AND ACCREDITATION

The entities of the APCER Group have several accreditations and notifications, which confirm their capacities as certification bodies for various references, both in the voluntary and regulatory fields.

More information on the Accreditations and Notifications, currently held by the APCER Group, can be found on the APCER's website.

## CERTIFICATION

Certification means recognized confidence... Know the areas where APCER operates:

- Energy
- Information and Digital Technologies
- Risk Management
- Environment
- Innovation
- Occupational Health and Safety
- Food Safety
- People
- Social Accountability
- Forests
- Quality

## AUDIT

Organizations need to assess the conformity of their processes or systems, internally or across their supply chain.

Performing internal audits and monitoring suppliers located around the world are activities that consume time and for which organizations do not always have available resources.

**APCER offers audits:**

- Worldwide, using local auditors with recognized competence
- For any economic sector
- In a short period of time, with reduced costs
- That meet customer needs
- Providing a detailed audit report with added value

## EDUCATION & TRAINING

The development of professionals involved in management systems implementation and continual improvement is essential, since it maximizes their efficiency and versatility, thus contributing to the sustainability of their organizations.

**Our training range offers different modalities: open enrollment training, in-company training, e-learning or blended training.**
